

All official LEGO® lines were represented to a greater or lesser extent, both official sets and MOCs and dioramas. In the Star Wars™ area we could find all official UCS and some MOCs of which LEGO would have to take note, such as the Venator that everyone would like to have with our ISD. There were also several dioramas of Space and Castle, but as always, City was the most numerous. Off course Mindstorms, Technic and GBC, which has become an essential in all events, were also present.

I personally want to thank Thierry Meyer for the time he spent with us during our visit.
